Testing a Mixed Reality Video Game (Bootle Blast) for Home-Based Practice of Arm-Hand Skills for Children with Cerebral Palsy

Do you or your child have Cerebral Palsy? Do you want to play a new mixed reality video game for hand-arm skills training? You may be eligible to take part in our study!

Participation in this study will last 24 weeks. For 12 of the 24 weeks, you will be given the Bootle Blast system to play at home for 15 - 20 minutes/day, 3-4 times per week. For the other 12 weeks, you will continue in your usual activities. You will come to Grandview 3 times during this study for research assessments.

Who can participate?

We are looking for kids who:

- Are between 6-17 years old
- Have a diagnosis of Hemiplegic Cerebral Palsy
- Have some difficulty handling objects (Levels I to III on the Manual Abilities Classification)
- Have time to play Bootle Blast for 15-20 minutes/day, 3-4 days/week for 12 weeks
- Do not have a medical condition impeding safe participation in physical activity associated with Bootle Blast

You will receive a \$50 gift card for participating, and a \$25 gas gift card for travel expenses
