Engagement of Children with Disabilities in Rehabilitation Services

Are you providing or receiving rehabilitation services? Participate in a study about child engagement in therapy!

The Pediatric Rehabilitation Intervention Measure of Engagement (PRIME-C) was developed to assess children's engagement in rehabilitation therapy. This study aims to refine its design and examine its accessibility and administration to suit the needs of children and youth with disabilities. Participation will take approximately two hours.

Who can participate?

We are looking for:

- **Children/Youth with a developmental disability** (15-25 years) who receive or used to receive services at Holland Bloorview, KidsAbility, Thames Valley Children's Centre or Grandview Kids.
- **Parents of children with a developmental disability** (8-18 years) who receive services at Holland Bloorview, KidsAbility, Thames Valley Children's Centre or Grandview Kids.
- **Paediatric rehabilitation service providers or program managers** with an appointment with Holland Bloorview, KidsAbility, Thames Valley Children's Centre or Grandview Kids.

To ask questions or to sign up, please contact:

Monika Novac Pavlic, Post-doctoral Fellow, at **novakpam@mcmaster.ca**

Shantel Mangroo, Program Manager, Research, Innovation and Knowledge Mobilization, at **research@grandviewkids.ca**
